Pronunciation of German in English

1. consonants

- **ch** is pronounced /x/, as in **Bach** and the Scots pronunciation of **loch**; after **i** and **e**, it is pronounced with a sound between /x/ and /ʃ/.
- **sch** is pronounced /ʃ/, as in **Schumacher**.
- **j** is pronounced /j/, as in the name of the psychologist **Jung**.
- **w** is pronounced /v/, as in **auf Wiedersehen**.
- **z** is pronounced /ts/, as in **Mozart**.

2. vowels

- **ie** is pronounced /iː/, as in **auf Wiedersehen** (so **Riesling** is /ˈriːslɪŋ/, not /ˈraɪs-/).
- **ei** is pronounced /aɪ/, as in **Eine Kleine Nachtmusik**.
- **au** is pronounced /aʊ/, as in **Strauss**.
- **äu** is pronounced /ɔɪ/, so the first vowel in **fräulein** rhymes with the English vowel in **coy**, not in **cow**.
- **eu** is also pronounced /ɔɪ/, as in **Deutschland**.
- **ö**, sometimes written **oe**, is pronounced /ɜː/, as in **Goethe**.
- **ü**, like the French **u**, is pronounced /y/, close to the common Scottish pronunciation of the vowel in words such as **you** and **book**.
- **u** is close to the Standard English pronunciations of the vowel in words such as **you** and **book**.

he or she

● There is no pronoun in English that stands neutrally for male and female. In order to achieve neutrality of gender, many people use **he or she**, as in:

✓ *There is a limit on what an individual teacher can achieve if he or she is not working in harmony with the rest of the school.*

● This becomes awkward if it has to be sustained in longer sentences, eg if you want to say □ *... if he or she is not working in harmony with his or her colleagues.*

The result is often inconsistency:

✗ *The aim is to find the child a substitute home until such time as he or she can return to their own home.*

● Other devices such as **s/he** are not widely accepted. An alternative is to put the whole sentence in the plural:

✓ *There is a limit on what individual teachers can achieve if they are not working in harmony with their colleagues.*

● Because of these difficulties, it is common to use **they** and **their** as gender-neutral pronouns, especially in less formal contexts:

✓ *If anyone has lost an umbrella, will they let me know.*

☞ RECOMMENDATION: use **they** and **their** in more informal English, but avoid it if you are talking to someone who is likely to be precise about the use of language.

hydra /ˈhaɪdrə/ ▷ *noun* (*hydras* or *hydrae* /ˈhaɪdriː/) **1** a freshwater polyp with a tube-like body and tentacles round the mouth, remarkable for its ability to multiply when cut or divided. **2** any manifold or persistent evil. **3** (**Hydra**) *Greek mythol* a water-monster with many heads, each of which when cut off was immediately replaced by two more. **4** (**Hydra**) *astron* a large southern constellation. ⓘ 14c: from Greek *hydor* water.

hydrangea /haɪˈdreɪndʒə/ ▷ *noun* (*hydrangeas*) a garden shrub, native to China and Japan, that has large clusters of white, pink or blue flowers. ⓘ 18c: from Greek *hydor* water + *angeion* vessel.

hydrant /ˈhaɪdrənt/ ▷ *noun* a pipe connected to the main water supply, especially in a street, with a nozzle for attaching a hose when fighting fires. ⓘ 19c: HYDR- + -ANT.

hydrate *chem* ▷ *noun* /ˈhaɪdreɪt/ a compound containing water which is chemically combined, and which may be expelled without affecting the composition of the other substance. ▷ *verb* /haɪˈdreɪt/ (*hydrated, hydrating*) **1** to form (such a compound) by combining with water. **2** to cause something to absorb water. ⓘ 19c: HYDR- + -ATE.

hydration ▷ *noun, chem* the process whereby water molecules become attached to the constituent ions of a SOLUTE as it is being dissolved in water.

hydraulic /haɪˈdrɒlɪk, -ˈdrɔlɪk/ ▷ *adj* **1** relating to hydraulics. **2** worked by the pressure of water or other fluid carried in pipes □ *hydraulic brakes*. **3** referring to something that sets in water □ *hydraulic cement*. • **hydraulically** *adverb*. ⓘ 17c: from Greek *hydor* water + *aulos* pipe.

hydraulic brake ▷ *noun, engineering* a brake in which the force is transmitted by means of compressed fluid.

hydraulic press ▷ *noun, engineering* a press that enables a small force on a small piston to exert a greater force on a larger piston by means of compressed water.

hydraulic ram ▷ *noun* **1** the larger piston in a hydraulic press system. **2** a device whereby the pressure head of moving water brought to rest in one compartment delivers water under pressure from a second compartment of a HYDRAULIC PRESS.

hydraulics ▷ *singular noun, engineering* the science of hydrodynamics, or the mechanical properties of fluids, especially water, at rest or in motion, and their practical applications, eg to water pipes.

hydraulic suspension and **hydroelastic suspension** ▷ *noun* in a motor vehicle: a system of suspension using hydraulic units, where a fluid provides the interconnection between the front and rear suspension units.

hydrazoic acid see under AZIDE

hydric /ˈhaɪdrɪk/ ▷ *adj* **1** relating to or containing hydrogen. **2** having or using an abundance of moisture. ⓘ Early 20c.

hydride /ˈhaɪdraɪd/ ▷ *noun* a chemical compound of hydrogen with another element or radical. ⓘ 19c.

hydriodic acid /haɪdrɪˈɒdɪk —/ ▷ *noun* the aqueous solution of hydrogen iodide.

hydro[1] /ˈhaɪdroʊ/ *noun* hydroelectric power. ⓘ Early 20c.

hydro[2] /ˈhaɪdroʊ/ *noun* (**hydros**) *Brit old use* a hotel or clinic, often situated near a spa, providing hydropathic treatment. ⓘ 1880s.

hydro- /haɪdroʊ, haɪdrə, haɪˈdrɒ/ or (before a vowel) **hydr-** *combining form, signifying* **1** water □ *hydroelectricity*. **2** hydrogen. ⓘ From Greek *hydor* water.

hydrobromic acid /haɪdroʊˈbroʊmɪk —/ ▷ *noun, chem* an aqueous solution of hydrogen and bromide.

hydrocarbon ▷ *noun, chem* any of a large group of organic chemical compounds that contain only carbon and hydrogen, occurring notably in oil, natural gas and coal. ⓘ 19c.

hydrocele /ˈhaɪdroʊsiːl/ ▷ *noun, medicine* a swelling containing serous fluid, often in the scrotum. ⓘ 16c: from Greek *kele* swelling.

hydrocephalus /haɪdroʊˈsɛfələs, -ˈkɛfələs/ ▷ *noun, medicine* an accumulation of serous fluid within the ventricles or cavities of the brain, usually occurring in young children. It causes enlargement of the head, and, if unimpeded, deterioration of the brain and its faculties. • **hydrocephalic** /-ˈfalɪk/ or **hydrocephalous** *adj*. ⓘ 17c: from Greek *kephale* head.

hydrochloric acid ▷ *noun, chem* (formula **HCl**) a strong corrosive acid, formed by dissolving hydrogen and chlorine in water, and widely used in laboratories and industries. ⓘ 19c.

hydrodynamics ▷ *singular noun* the science of the movement, equilibrium and power of liquids. See also HYDROKINETICS, HYDROSTATICS. • **hydrodynamicist** *noun*

a specialist in or student of hydrodynamics. • **hydrodynamic** or **hydrodynamical** *adj.* ⓘ 18c.

hydroelectricity and **hydroelectric power** ▷ *noun* electricity generated by turbines that are driven by the force of falling water. • **hydroelectric** *adj* electricity generated using this system. • **hydroelectrically** *adverb.* ⓘ 19c.

hydrofluoric acid /haɪdroʊflʊ'ɒrɪk —/ ▷ *noun* an acid composed of hydrogen and fluorine.

hydrofoil /'haɪdrəfɔɪl/ ▷ *noun* **1** a device on a boat which raises it out of the water as it accelerates. **2** a boat fitted with such a device. ⓘ Early 20c: modelled on AEROFOIL.

hydrogen /'haɪdrədʒən/ ▷ *noun* (symbol **H**, atomic number 1) a flammable colourless odourless gas which is the lightest of all known substances and by far the most abundant element in the universe. ⓘ 18c: from French *hydrogène*, from HYDRO- + Greek *gennaein* to produce.

hydrogenate /'haɪdrədʒəneɪt, haɪ'drɒ-/ ▷ *verb* (*hydrogenated*, *hydrogenating*) to undergo or cause to undergo hydrogenation.

hydrogenation ▷ *noun, chem* any chemical reaction where hydrogen is combined with another substance. ⓘ Early 19c.

hydrogen bomb and **H-bomb** ▷ *noun, military* a bomb which releases vast amounts of energy as a result of hydrogen nuclei being converted into helium nuclei by fusion, a process started by a fission bomb. Also called **thermonuclear bomb**.

hydrogen bond ▷ *noun, chem* a weak chemical bond between an electronegative atom with a lone pair of electrons (eg oxygen, nitrogen, fluorine) and covalently bonded hydrogen atoms.

hydrogen carbonate ▷ *noun, chem* an acid salt of carbonic acid. Also called **bicarbonate**.

hydrogen chloride ▷ *noun, chem* (formula **HCl**) a poisonous colourless and corrosive gas prepared by treating sodium chloride with concentrated sulphuric acid.

hydrogen cyanide ▷ *noun, chem* (formula **HCN**) a toxic gas which when dissolved in water forms **hydrocyanic acid** (a dilute form of which is called PRUSSIC ACID).

hydrogen iodide ▷ *noun, chem* (formula **HI**) a heavy, colourless, poisonous gas formed by the direct combination of hydrogen and iodine.

hydrogen ion ▷ *noun, chem* a hydrogen atom or molecule carrying a positive charge, especially one formed in a solution of acid in water. Also called PROTON.

hydrogenize or **hydrogenise** /'haɪdrədʒɪnaɪz, haɪ'drɒ-/ ▷ *verb* (*hydrogenized*, *hydrogenizing*) to hydrogenate.

hydrogenous /haɪ'drɒdʒənəs/ ▷ *adj* relating to or consisting of hydrogen. ⓘ 18c.

hydrogen peroxide ▷ *noun, chem* (formula $\mathbf{H_2O_2}$) an unstable colourless viscous liquid that is a strong oxidizing agent, is soluble in water and is used as an oxidant in rocket fuel and a bleach for hair and textiles. Also called PEROXIDE.

hydrogensulphate ▷ *noun, chem* a salt or ester of sulphuric acid containing the ion HSO_4^-. Also called **bisulphate**.

hydrogen sulphide ▷ *noun, chem* (formula $\mathbf{H_2S}$) a colourless, toxic gas composed of hydrogen and sulphur with a characteristic smell of bad eggs, produced by decaying organic matter, and also found in natural gas and volcanic emissions.

hydrography /haɪ'drɒgrəfɪ/ ▷ *noun* the science of charting and mapping seas, rivers and lakes, and of studying tides, currents, winds, etc. • **hydrographer** *noun.* • **hydrographic** *adj.* ⓘ 16c.

hydroid /'haɪdrɔɪd/ *zool* ▷ *adj* belonging, referring or similar to a hydra; polypoid. ▷ *noun* a type of COELENTERATE which reproduces asexually; a polyp.

hydrokinetics ▷ *singular noun* the branch of hydrodynamics which deals with fluids in motion. Compare HYDROSTATICS. • **hydrokinetic** *adj* **1** referring or relating to hydrokinetics or to the movement of fluids. **2** operated or operating by the movement of fluids. ⓘ 19c.

hydrology /haɪ'drɒlədʒɪ/ ▷ *noun* the scientific study of the occurrence, movement and properties of water on the Earth's surface, and in the atmosphere. • **hydrologic** or **hydrological** *adj.* • **hydrologically** *adverb.* • **hydrologist** *noun.* ⓘ 18c.

hydrolyse or **hydrolyze** /'haɪdrəlaɪz/ ▷ *verb* (*hydrolysed*, *hydrolysing*) to subject to or occur by hydrolysis.

hydrolysis /haɪ'drɒlɪsɪs/ ▷ *noun* the chemical decomposition of organic compounds caused by the action of water. • **hydrolytic** /haɪdrə'lɪtɪk/ *adj.* ⓘ 19c.

hydrolyte /'haɪdrəlaɪt/ ▷ *noun* a body subjected to hydrolysis.

hydromel /'haɪdroʊmel/ ▷ *noun* MEAD[1]. ⓘ 15c: from Greek *meli* honey.

hydrometer /haɪ'drɒmɪtə(r)/ ▷ *noun, physics* a floating device used to measure the density of a liquid, indicated by the depth of immersion of a weighted glass bulb with a calibrated stem. • **hydrometric** or **hydrometrical** *adj.* • **hydrometry** *noun.* ⓘ 17c.

hydropathy /haɪ'drɒpəθɪ/ ▷ *noun* the treatment of disease or illness using large amounts of water both internally and externally. • **hydropathic** /haɪdroʊ'paθɪk/ *adj.* • **hydropathically** *adverb.* • **hydropathist** *noun* a person who practises hydropathy. ⓘ 19c.

hydrophilic /haɪdroʊ'fɪlɪk/ ▷ *adj, chem* referring to a substance that absorbs, attracts or has an affinity for water. • **hydrophile** /-faɪl/ *noun.* ⓘ Early 20c.

hydrophobia ▷ *noun* **1** a fear or horror of water. **2** the inability to swallow water, especially as a symptom of rabies. **3** rabies. • **hydrophobe** *noun.* ⓘ 16c.

hydrophobic ▷ *adj* **1** *chem* referring to a substance that repels or does not absorb water. **2** relating to or suffering from hydrophobia. • **hydrophobicity** *noun.*

hydrophone ▷ *noun* a device for listening to sounds conveyed by water. ⓘ 19c.

hydrophylic /haɪdroʊ'fɪlɪk/ ▷ *adj, chem* referring to a substance that readily absorbs water or is easily wetted by water.

hydrophyte /'haɪdroʊfaɪt/ ▷ *noun, bot* a plant which grows in water or very moist conditions. • **hydrophytic** /-'fɪtɪk/ *adj.* ⓘ 19c.

hydroplane ▷ *noun* **1** a light motorboat with a flat bottom or hydrofoils which, at high speeds, skims along the surface of the water. **2** a fin-like device attached to a submarine allowing it to rise and fall in the water. **3** a seaplane. ▷ *verb, intr* **1** said of a boat: to skim on the surface of the water like a hydroplane. **2** said of a road vehicle: to skid on a wet surface; to aquaplane. ⓘ Early 20c.

hydroponics /haɪdroʊ'pɒnɪks/ ▷ *singular noun, bot* the practice or technique of growing plants without using soil, by immersing the roots in a chemical solution that contains essential nutrients, and using sand or gravel as support. • **hydroponic** *adj.* • **hydroponically** *adverb.* ⓘ 1930s: from Greek *ponos* work or toil.

hydropower ▷ *noun* hydroelectric power.

hydroquinone /haɪdrəkwɪ'noʊn/ ▷ *noun, photog* a white crystalline substance that is used as a reducing

agent and as a photographic developer. Also called **quinol**.

hydrosphere ▷ *noun* the water, such as seas and rivers, on the surface of the earth. ◷ 19c.

hydrostatics ▷ *singular noun* the branch of hydrodynamics which deals with the behaviour and power of fluids which are not in motion. • **hydrostatic** or **hydrostatical** *adj*. Compare HYDROKINETICS. ◷ 17c.

hydrotherapy ▷ *noun*, *medicine* the treatment of diseases and disorders by the external use of water, especially the treatment of disability by developing movement in water. • **hydrotherapeutic** *adj*. • **hydrotherapeutics** *singular noun* the area of medicine concerned with hydrotherapy. ◷ 19c.

hydrotropism /haɪˈdrɒtrəpɪzəm/ ▷ *noun* the tendency of the roots of a plant to turn towards (**positive hydrotropism**) or away from (**negative hydrotropism**) moisture. Compare HELIOTROPISM. ◷ 19c.

hydrous /ˈhaɪdrəs/ ▷ *adj* said of a substance: containing water. ◷ 19c.

hydroxide /haɪˈdrɒksaɪd/ ▷ *noun*, *chem* a chemical compound containing one or more hydroxyl groups.

hydroxy- /haɪˈdrɒksɪ/ ▷ *combining form*, *chem*, *signifying* that it contains one or more hydroxyl groups.

hydroxyl /haɪˈdrɒksɪl/ ▷ *noun*, *chem* a compound radical containing one oxygen atom and one hydrogen atom. ◷ 19c: from *hydrogen* + *oxygen* + -YL.

hydrozoan /haɪdroʊˈzoʊən/ ▷ *noun* (*hydrozoa*) a coelenterate of the mainly marine class **Hydrozoa**, in which alternation of generations typically occurs, eg the zoophytes. • **hydrozoan** *noun*, *adj*. ◷ 19c: from HYDRO- + Greek *zoon*, plural *zoa* animal.

hyena or **hyaena** /haɪˈiːnə/ ▷ *noun* (*hyenas* or *hyaenas*) any of various kinds of carrion-feeding doglike mammals native to Africa and Asia, which have a long thick neck, coarse mane, and a sloping body, and known for their howls which resemble hysterical laughter. ◷ 14c: from Greek *hyaina*, from *hys* pig.

hygiene /ˈhaɪdʒiːn/ ▷ *noun* **1** the practice or study of preserving one's health and preventing the spread of disease, especially by keeping oneself and one's surroundings clean. **2** sanitary principles and practices. ◷ 16c: from Greek *hygieia* health.

hygienic /haɪˈdʒiːnɪk/ ▷ *adj* promoting and preserving health; sanitary. • **hygienically** *adverb*. ◷ 19c.

hygienics /haɪˈdʒiːnɪks/ ▷ *singular noun* the principles of HYGIENE (sense 1).

hygienist /ˈhaɪdʒiːnɪst/ ▷ *noun* a person skilled in the practice of hygiene.

hygro- /haɪgroʊ, haɪˈgrɒ, haɪgrə/ or (before a vowel) **hygr-** *combining form*, *signifying* wet, moist.

hygrology /haɪˈgrɒlədʒɪ/ ▷ *noun* the study of humidity in gases, especially the atmosphere. ◷ 18c.

hygrometer /haɪˈgrɒmɪtə(r)/ ▷ *noun*, *meteorol* a device for measuring the humidity of gases or of the air, ie the amount of water vapour in the atmosphere. ◷ 17c.

hygrometry /haɪˈgrɒmɪtrɪ/ ▷ *noun* a measurement of the humidity of the air or of other gases. • **hygrometric** or **hygrometrical** *adj*.

hygrophyte /ˈhaɪgroʊfaɪt/ ▷ *noun*, *bot* a plant adapted for living in moist conditions. • **hygrophytic** /-ˈfɪtɪk/ *adj*. ◷ Early 20c.

hygroscope /ˈhaɪgrəskoʊp/ ▷ *noun* a device which indicates changes in air humidity without measuring it. ◷ 17c.

hygroscopic /haɪgrəˈskɒpɪk/ and **hygroscopical** ▷ *adj* **1** relating to the hygroscope. **2** said of a substance: able to absorb moisture from the air. **3** said eg of some movements of plants: indicating or caused by absorption or loss of moisture. • **hygroscopically** *adverb*. • **hygroscopicity** /-skɒˈpɪsɪtɪ/ *noun*. ◷ 18c.

hying see under HIE

hymen /ˈhaɪmen, -mən/ ▷ *noun*, *anatomy* a thin membrane that covers the opening of the vagina, and may be broken the first time a woman has sexual intercourse, but is usually at least partially ruptured before puberty. • **hymenal** *adj*. ◷ 17c: Greek.

hymenopteran /haɪməˈnɒptərən/ ▷ *noun* an insect belonging to the diverse order **Hymenoptera**, members of which often but not always have four membranous wings, including ants, bees, wasps and sawflies. • **hymenopterous** *adj*. ◷ 18c: from Greek *hymen* membrane + -PTERA.

hymn /hɪm/ ▷ *noun* a song of praise, especially to God, but also to a nation, etc. ▷ *verb* (*hymned*, *hymning*) **1** to celebrate in song or worship by hymns. **2** *intr* to sing in adoration. ◷ Anglo-Saxon: from Greek *hymnos*.

hymnal /ˈhɪmnəl/ ▷ *noun* (*also* **hymnary**) a book containing hymns. ▷ *adj* (*also* **hymnic**) referring or relating to hymns. ◷ 17c.

hymn-book ▷ *noun* a book or collection of hymns.

hymnody /ˈhɪmnədɪ/ ▷ *noun* (*hymnodies*) **1** the writing or singing of hymns. **2** hymns as a group. • **hymnodist** or **hymnist** *noun* someone who composes hymns. ◷ 18c.

hymnology /hɪmˈnɒlədʒɪ/ ▷ *noun* the study or composition of hymns. • **hymnologist** *noun*. ◷ 17c.

hyoid /ˈhaɪɔɪd/ ▷ *adj* referring to the **hyoid bone**, a curved bone at the base of the tongue.

hyoscine /ˈhaɪoʊsiːn/ ▷ *noun* an alkaloid drug obtained from certain plants, eg henbane, with actions on the intestines and nervous system, given for travel sickness, used as a truth drug, etc. Also called **scopolamine**. ◷ 19c.

hyoscyamine /haɪəˈsaɪəmiːn/ ▷ *noun* a poisonous alkaloid similar to atropine, extracted from henbane. ◷ 19c: from Greek *hyoskyamos*, from *hys* pig + *kyamos* bean.

hyp. ▷ *abbreviation* **1** hypotenuse. **2** hypothesis. **3** hypothetical.

hypaethral /hɪˈpiːθrəl, haɪ-/ ▷ *adj* said especially of a classical building: open to the sky; roofless. ◷ 18c: from Greek *hypo* beneath + *aither* air or sky.

hypallage /haɪˈpalədʒiː, hɪ-/ ▷ *noun*, *rhetoric* a figure of speech where the standard relations of words are mutually interchanged. ◷ 16c: Greek, literally 'interchange', from *hypo* under + *allassein* to exchange.

hypnopaedia /hɪpnoʊ'piːdɪə/ ⊳ *noun* the learning of something, or conditioning of someone by the repetition

hyphen

A **hyphen** should be used for

1. linking words

● It links elements of a multi-word phrase that describes a following noun □ *a never-to-be-forgotten experience* □ *a balance-of-payments problem* □ *her absurd caught-in-at-the-knees skirt* □ *an up-to-date timetable.*

Note that hyphens are not normally needed when the phrase describes a preceding noun, as in *It was an experience never to be forgotten*, although where there is an intervening modifying adverb, hyphens are usually retained, as in *This timetable is thoroughly up-to-date.*

● It links elements of a multi-word phrase that functions as a noun □ *his mother-in-law* □ *a bunch of forget-me-nots* □ *a man-about-town* □ *a jack-in-the-box.*

● It links elements of a multi-word phrase that has a suffix added to make it function as a single unit □ *Esmond was being very Justice-of-the-Peace-y* □ *The aunts raised their eyebrows with a good deal of To-what-are-we-indebted-for-the-honour-of-this-visitness.*

● It links elements of numbers from 21 to 99, and elements of fractions □ *twenty-three* □ *three-quarters.*

● It links elements of a two-word adjective that describes a following noun □ *a half-open door* □ *a repertoire of all-time favourites* □ *a next-door neighbour* □ *a well-known writer* □ *one of its best-loved characters.*

Note that there are categories of two-word adjectives that retain their hyphens when they describe a preceding noun:

(1) a combination of adjective + participle, or word ending in *-ed*, as in *We are dreadfully short-staffed here* and *The toll of job losses seems never-ending.*

(2) a combination of adjective + noun, as in *I thought the performance was pretty second-rate.*

(3) a combination of noun + adjective, as in *The path was ankle-deep in weeds.*

Note that adverbs ending in *-ly* are not linked to a following word, except in cases where the two are felt to function as a single unit of meaning, so *a beautifully illustrated book*, but *a mentally-handicapped child.*

● It links elements of nouns formed from phrasal verbs □ *line-up* □ *drive-in fly-past.*

● It links elements of adjectives formed from phrasal verbs when the adjective describes a following noun □ *an unhoped-for success* □ *a hung-up young man.*

2. splitting words

● A hyphen marks a break in a word at the end of a line of print, where part of the word has been taken over to the next line.

Take care to split the word into logical or unambiguous units: *mis-/shapen*, not *miss-/hapen*; *re-/install*, not *rein-/stall*; and, *the-/rapist*, not *the-/rapist.*

● It marks a break in a word whose second element is implied but not shown, as in *a four- or fivefold increase.*

Pronunciation of Latin in English

Most Latin words and phrases used in English are said with a strongly anglicized pronunciation, which is quite different from the way they were pronounced in ancient Rome. Other Latin expressions came into English from church Latin, or from medieval Latin, which were pronounced in yet another way.

It is therefore not always easy to predict the exact anglicized pronunciation of Latin words and phrases, but the following rules generally apply:

● Unstressed *i*'s are pronounced /ɪ/.

● Stressed *i*'s are usually pronounced /aɪ/, as in **ad infinitum** /ad ɪnfɪˈnaɪtəm/ and **bona fide** /boʊnə ˈfaɪdɪ/, but if they are short they too are pronounced /ɪ/, as in **ab initio** /ab ɪˈnɪʃɪoʊ/.

● At the end of a word, Latin *-i* is pronounced /aɪ/, as in the plurals **cacti** and **stimuli**, and in technical scientific names such as **Musci** /ˈmʌsaɪ/, the mosses.

● The letters *ae* are normally pronounced /iː/, as commonly in technical scientific names such as **Compositae** /kəmˈpɒzɪtiː/, the botanical name for the family of flowering plants that includes the daisy and dandelion.

Occasionally, and unpredictably, some Latin words and phrases are not normally anglicized in pronunciation. In **curriculum vitae**, for example, **vitae** is normally pronounced /ˈviːtaɪ/ as in Classical Latin or /ˈviːteɪ/ as in church Latin, rather than the expected /ˈvaɪtiː/ of anglicized Latin.

As examples of the pronunciation of other vowels, note the following: **inter alia** /ɪntəˈreɪlɪə/, **quod erat demonstrandum** /kwɒd ˈerat demənˈstrandəm/, **pro bono publico** /proʊ ˈboʊnoʊ ˈpʊblɪkoʊ/, **modus operandi** /ˈmoʊdəs ɒpəˈrandaɪ/.

Pronunciation of *c* and *g* varies in different contexts:

● Before *a* and *o*: *c* and *g* are pronounced /k/ and /g/ respectively.

● Before *e* and *i*: *c* is usually pronounced /s/, as in **circa** /ˈsɜːkə/, and *g* is pronounced /dʒ/, as in **fungi** /ˈfʌndʒaɪ/.

● However, before *i*: *c* (and also *t*) may be pronounced /ʃ/, as in **prima facie** /ˈpraɪmə ˈfeɪʃɪ/ and **ab initio** /ab ɪˈnɪʃɪoʊ/.

> *lay, lie*
>
> ● These two verbs are commonly confused - even by native speakers - because their meanings are close and their forms overlap, since **lay** is also the past of **lie**:
>
> ✓ *When she reached her room Lucy lay on the bed to review the situation.*
>
> ✗ *I got so tired I used to lay down on the bunk.*
>
> ✓ *Many individual units had begun to lay down their arms.*
>
> ● Another cause of confusion is the closeness in form of **laid** and **lain**, and the fact that **laid** is the past and past participle of **lay**, but **lain** is only the past participle of **lie**:
>
> ✓ *He paused, then laid a hand on her shoulder.*
>
> ✗ *She had also lain aside her clothes and was dressed in nothing but an orange robe.*
>
> ✓ *After waking he had lain and thought of the day ahead.*

less, fewer

● **Less** is a grammatically complex word with several part-of-speech functions, as the entry shows. Its use overlaps with **fewer** when it qualifies plural nouns, especially in conversation:

? *They admitted this measure will lead to less prosecutions.*

Strictly, **fewer** is more correct in this case. The reason **less** is used here instead of **fewer** is that the total amount predominates in the mind over the plurality implied by the strict grammar of the noun. This is especially true

● when measurements (including time and distance) and words like **dozen**, **hundred**, etc, are used,

● when **less** is to be identified with a singular or indivisible subject.

● and when the construction is **less than**.

✓ *There were less than twelve hours before the big day.*

✓ *A baby girl less than two years old.*

✓ *Less than twenty of them made it back to England.*

✓ *People who are 65 years of age or less.*

✓ *The murders were committed less than three weeks ago.*

✓ *They were sentenced to imprisonment with hard labour for not less than three years.*

● In all these cases, **fewer** would be unidiomatic or even ungrammatical, and not typical of current English.

☆ RECOMMENDATION: it is legitimate to use **less** instead of **fewer** when the sense requires it; use **fewer** with straightforward plurals.

an interpretation of words, etc that is without allusion or metaphor: really □ *Put that mirror away — I didn't mean that you literally had egg on your face!*

> ***literally***
>
> ● In sense 2a, **literally** is often regarded as incorrect or as poor style, but it is an appropriate intensifier within the context of the idiom it is intensifying; other intensifiers like **really** and **utterly** would not work within the image or metaphor on which the the idiom is based □ *The red carpet was literally out for them* □ *Nurses are literally worrying themselves sick trying to cope with the increased pressures of their jobs* □ *It was literally a dream come true.*
>
> ● Often, the use of **literally** signals the relevance and punning nature of the idiom, especially when it is a cliché, as in some of the examples above. Occasionally, the effect is comic □ *People have been literally beside themselves with frustration.*
>
> ☆ RECOMMENDATION: **literally** is in common use to intensify an idiom, and this is not incorrect; but beware of unintentionally bizarre or humorous effects.
